Heredity

Volume 65 Number 1 August 1990

John B. Gibson, Darryl Reed, Ann Verona Wilks and Chengshan Jiang
Molecular similarity of *Drosophila melanogaster* alcohol dehydrogenase thermostable alleles from populations on different continents 1

J. Santos, C. Sentís, J. García-Rodríguez and J. Fernández-Piqueras
Latent NORs in the species *Pycnogaster cucullata* (*Orthoptera*) 7

J. Loidl, F. Ehrendorfer and D. Schweizer
EM analysis of meiotic chromosome pairing in a pentaploid *Achillea* hybrid 11

Consuelo Soler, Pilar García and Nicolás Jouve
Meiotic expression of modified chromosome constitution and structure in × *Triticosecale* Wittmack 21

L. S. Luckinbill, V. Riha, S. Rhine and T. A. Grudzien
The role of glucose-6-phosphate dehydrogenase in the evolution of longevity in *Drosophila melanogaster* 29

J. C. Adell, A. Moya, V. Molina and F. González-Candelas
On the analysis of viability data: an example with *Drosophila* 39

R. K. Butlin
Divergence in emergence time of host races due to differential gene flow 47

Stefan Andersson and Andrew Lambertsson
Characterization of a novel *Minute*-locus in *Drosophila melanogaster*: a putative ribosomal protein gene 51

A. Civetta, J. C. Vilardi, B. O. Saidman, C. A. Leanza and J. L. Cladera
Estimation of the number of ovipositing females per fruit in the Mediterranean fruit fly *Ceratitis capitata* Wied. (Diptera: Tephritidae) 59

Rosemary G. Gillespie and Bruce E. Tabashnik
Maintaining a happy face: stable colour polymorphism in the spider *Theiridion grallator* (Araneae, Theridiidae) 67

Yo-Ichiro Sato, Ryuuji Ishikawa and Hiroko Morishima
Nonrandom association of genes and characters found in *indica* × *japonica* hybrids of rice 75

Lee Watkins and Donald A. Levin
Outcrossing rates as related to plant density in *Phlox drummondii* 81

K. D. Pitafi, R. Simpson, J. J. Stephen and T. H. Day
Adult size and mate choice in seaweed flies (*Coelopa frigida*) 91

B. P. Forster, M. S. Phillips, T. E. Miller, E. Baird and W. Powell
Chromosome location of genes controlling tolerance to salt (NaCl) and vigour in *Hordeum vulgare* and *H. chilense* 99

Wade N. Hazel
Sex-limited variability and mimicry in the swallowtail butterfly *Papilio polyxenes* Fabr. 109

W. Powell, R. P. Ellis, M. Macaulay, J. McNicol and B. P. Forster
The effect of selection for protein and isozyme loci on quantitative traits in a doubled haploid population of barley 115

Robert H. Cowie
Climatic selection on body colour in the land snail *Theba pisana* (Pulmonata: Helicidae) 123

Kenneth Mather
Consequences of stabilising selection for polygenic variation. II. Any number of loci 127

Annalisa Marchi and Roberto Mezzanotte
Inter- and intraspecific heterochromatin variation detected by restriction endonuclease digestion in two sibling species of the *Anopheles maculipennis* complex 135

Volume 65 Number 2 October 1990

Philip W. Hedrick
Genotypic-specific habitat selection: a new model and its application 145

Angel Amores, Vicente Giles, Guillermo Thode and M^a Carmen Alvarez
Adaptative character of a Robertsonian fusion in chromosomes of the fish *Gobius paganellus* (Pisces, Perciformes) 151

C. Juan, J. Gosálvez and E. Petitpierre
Improving beetle karyotype analysis: restriction endonuclease banding of *Tenebrio molitor* chromosomes 157

D. A. Roff
Selection for changes in the incidence of wing dimorphism in *Gryllus firmus* 163

D. A. Roff
Antagonistic pleiotropy and the evolution of wing dimorphism in the sand cricket, *Gryllus firmus* 169

Alexis Ducousso, Daniel Petit, Myrian Valero and Philippe Vernet
Genetic variation between and within populations of a perennial grass: *Arrhenatherum elatius* 179

J. F. Sampson, S. D. Hopper and S. H. James
Temporal variation in allele frequencies in the pollen pool of *Eucalyptus rhodantha* 189

M. A. Cornish
Selection during a selfing programme. I. The effects of a single round of selection 201

M. A. Cornish
Selection during a selfing programme. II. The effects of two or more rounds of selection 213

Takeshi Suzuki and Kunio Iwatsuki
Genetic variation in agamosporous fern *Pteris cretică* L. in Japan 221

P. W. E. Kearns, I. P. M. Tomlinson, P. O'Donald and C. J. Veltman
Non-random mating in the two-spot ladybird (*Adalia bipunctata*): I. A reassessment of the evidence 229

Laurence Packer and Robin E. Owen
Allozyme variation, linkage disequilibrium and diploid male production in a primitively social bee *Augochlorella striata* (Hymenoptera; Halictidae) 241

N. W. Galwey and A. J. Shirlin
Selection of borage (*Borago officinalis*) as a seed crop for pharmaceutical uses 249

W. Powell, R. P. Ellis and W. T. B. Thomas
The effects of major genes on quantitatively varying characters in barley. III. The two row/six row locus (V–v) 259

S. I. Agulnik, P. M. Borodin, I. P. Gorlov, T. Yu Ladygina and S. D. Pak
The origin of a double insertion of homogeneously staining regions in the house mouse (*Mus musculus musculus*) 265

A. Brehm and C. B. Krimbas
Evolution of the *obscura* and *Drosophila* species. III. Phylogenetic relationships in the *subobscura* cluster based on homologies of chromosome A 269

GENETICAL SOCIETY ABSTRACTS (3 to 6 April 1990 Meeting) 277

Volume 65 Number 3 December 1990

Kermit Ritland, Douglas E. Soltis and Pamela S. Soltis
A two-locus model for the joint estimation of intergametophytic and intragametophytic selfing rates 289

M. L. Arnold, J. L. Hamrick and B. D. Bennett
Allozyme variation in Louisiana irises: a test for introgression and hybrid speciation 297

Eviatar Nevo, Keichiro Joh, Katsuji Hori and Avigdor Beiles
Aldolase DNA polymorphism in subterranean mole-rats: genetic differentiation and environmental correlates 307

Debra R. Possidente, Jennifer Greaux and Bernard Possidente
Quantitative genetic background effects on the *Antennapaedia* phenotype in *Drosophila melanogaster* 321

M. van de Ven, W. Powell, G. Ramsay and R. Waugh
Restriction fragment length polymorphisms as genetic markers in *Vicia* 329

Philip W. Hedrick and Kermit Ritland
Gametic disequilibrium and multilocus estimation of selfing rates 343

Peter Van Dijk and Wilke Van Delden
Evidence for autotetraploidy in *Plantago media* and comparisons between natural and artificial cytotypes concerning cell size and fertility 349

B. M. N. Wallace and J. B. Searle
Synaptonemal complex studies of the common shrew (*Sorex araneus*). Comparison of Robertsonian heterozygotes and homozygotes by light microscopy 359

Rosabelle Samuel, Wilhelm Pinsker and Friedrich Ehrendorfer
Allozyme polymorphism in diploid and polyploid populations of *Galium* 369

I. Yu. Vizir and A. B. Korol
Sex difference in recombination frequency in *Arabidopsis* 379

J. S. Heslop-Harrison, A. R. Leitch, T. Schwarzacher and K. Anamthawat-Jónsson
Detection and characterization of 1B/1R translocations in hexaploid wheat 385

Timothy Boyle, Chaiyasit Liengsiri and Chana Piewluang
Genetic structure of black spruce on two contrasting sites 393

John Stimson and Mark Berman
Predator induced colour polymorphism in *Danaus plexippus* L. (Lepidoptera: Nymphalidae) in Hawaii 401

B. Comps, B. Thiébaut, L. Paule, D. Merzeau and J. Letouzey
Allozymic variability in beechwoods (*Fagus sylvatica* L.) over central Europe: spatial differentiation among and within populations 407

J. L. Santos and M. I. Cano
Evidence of a joint control of chiasma formation in spermatocytes and oocytes of a grasshopper 419

L. M. Cook
Systematic effects on morph frequency in the polymorphic mangrove snail *Littoraria pallescens* 423

Per Erik Jorde and Nils Ryman
Allele frequency estimation at loci with incomplete co-dominant expression 429

Jaakko Lumme and Erja Heikkinen
Viability of first and second generation hybrids of *Drosophila virilis* and *Drosophila lummei* 435

W. N. Hazel and M. S. Johnson
Microhabitat choice and polymorphism in the land snail *Theba pisana* (Müller) 449

Begoña Fernández-Calvín and Juan Orellana
High molecular weight glutenin subunit variation in the *Sitopsis* section of *Aegilops*. Implications for the origin of the B genome of wheat 455

INDEX 465
